

Globalone E-SIM User Guide

Step 1 : Download APP

You can find the latest version of CSIPSimple at Android Market.

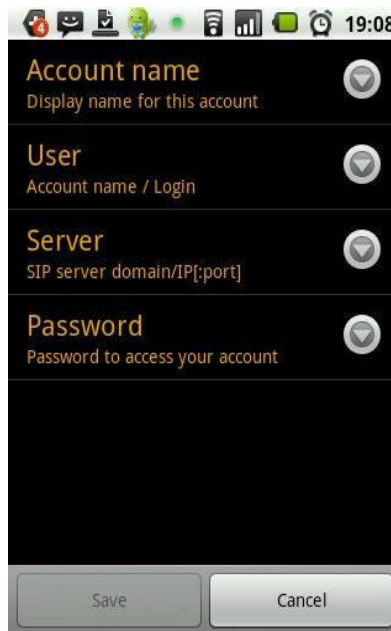

Step 2 : Install APP

Install the CSIPSimple app for your Android phone when you are in Wi-Fi zone or having internet connection, open the application. Click on "Add Account" and choose "Basic".

Step 3 : Configuring Globalone E-SIM Service

Enter the following information;

Account name
Display name for this account

User
Account name / Login

Server
SIP server domain/IP[:port]

Password
Password to access your account

Save Cancel

Account Name : Global One ESIM

User : 14 Digit Subscriber number provided by Global One

Server : Sip.s.im

Password: Enter the password given by Global One for login to your E-SIM account

Step 4 : Using E-SIM Service

Once it is registered to Globalone E-SIM servers, you are ready to make E-SIM Calls....
Congrats!! Now, for dialing any international calls, just dial 011 followed by the country code and phone number, then press the green button.
